

MODULE 1 · CHOOSING AI FOR YOUR LAW FIRM

Your Course Map + Decision Statement

Before anything else: write down what your firm is actually deciding. Not “we need an AI strategy” — something a partner could disagree with.

1 · The decision, in one sentence

Format: “We are putting *[what]* on *[which work]*, reviewed by *[who]*, and we will know by *[when]* whether it worked.”

2 · What you will hold at the end

Module	Artifact you build	Done
2 · Pick the work	Workflow shortlist, with a named reviewer each	☐
3 · Wiring	One-page assistant wiring canvas	☐
4 · Controls	Five security questions, answered in writing	☐
5 · Scorecard	Weighted scorecard, three shortlisted options	☐
6 · Pilot	Pilot charter + test-set plan	☐
7 · Governance	Owner map + AI policy outline	☐
8 · Close	Your 90-day plan	☐

3 · Who needs to agree

Name them now. A decision nobody signed is a discussion.

Role	Name	What they must approve
Business owner		The outcome
IT / security		Access + logging
Privacy / legal		Client obligations
Professional reviewer		The output
